---

The description of the new locations for those two wells is consistent with our discussions in the field.

Do they intend to present them on the figure?

Hello All,

ARCADIS provided the attached FCRs and comments. Please let me know if you have any concerns.

Thanks,

Tanya

Please see the attached field change request for the relocation of MW-15 and MW-19. The proposed locations for these wells are both in standing water. We are requesting that they be moved 40 feet and 17 feet, respectively, so that they are located on dry ground. Please let me know if you approve these changes.

Also, as of this morning, MW-17 and MW-11 have been installed. MW-16 will be installed today.
